

EDI

Would you like to ensure all expenses are registered and linked to the right task?

Linking costs and expenses to the right tasks is crucial for steering task economy. But it can be a time consuming process, taking up a lot of administration.

With the EDI module you ensure that all incoming invoices are automatically registered in Microbizz and posted on the corresponding task. This eliminates the risk of typing errors and the risk of overlooking invoices and costs.

You will save administration time and increase the speed of the bookkeeping process.

EDI module functionality

- Incoming invoices and credit notes are registered automatically on the right task in Microbizz
- The person responsible for the task receives invoices and credit notes for approval electronically – before posting

Benefits

Less administration

With the EDI module, your invoicing processes are 100% automated.

Increased earnings

As invoices and goods consumption are automatically registered on the task, you can ensure that all expenses are re-invoiced.

Fewer errors

The automated process eliminates the need for manual work and the risk of errors.

Overview & transparency

100% real time overview and transparency of your bookkeeping, income and expenses.
